## INSURANCE TIPS

### Renovating or Adding an Addition to Your Home or Business?

Many homeowner and commercial building policies do not cover structures while they are being built or an area that is being remodeled. Here are some common examples of gaps in coverage:

- During kitchen renovation, your cabinets are in your garage, and a fire starts in the garage damaging the uninstalled cabinets.
- Lumber was delivered, and the next morning you notice the lumber was stolen.
- Your partially built addition was damaged during a wind storm, and you have to rebuild the structure.

A standard homeowner or business policy would not cover these scenarios. If you are getting ready to start a remodeling or new addition project for your home or business, please contact us ahead of time to make sure we have the right coverage in place to protect your new addition or renovation from becoming a disaster.

## TREE OF LIFE ORPHANAGE

**Tree of Life is an orphanage in Benin, West Africa**, where Rachel and Justin Gruelle (Deandra's daughter and son-in-law) work. It is not just an orphanage but an organization that serves the community and surrounding areas. Tree of Life uses test kits that can detect malaria within minutes, so that treatment can begin immediately.

**Robert K. Jones Insurance presented a \$500 donation to Tree of Life, USA that will purchase vital malaria test kits for the orphanage.** This donation is making it possible for Tree of Life to save the lives of the many children and adults that come to them for help each year. Thank you Jones Insurance for your love and kindness, it is truly a blessing.
